

INSPECTA X-RAY

INSPECTA L (1 head)

INSPECTA HPL (2 head)

is the new Pluritec® X-Ray optimizer.

The wide range of configurations allow us to have, in addition to the standard and unique X-Ray feature, an accurate driller and/or router machine all in the same unit.

This means maximum versatility and flexibility that in combination with a large working area, make s the INSPECTA an exclusive machine in the market for the process of multilayer products.

The patented "One Step X-Ray drilling & Routing" function will perform, via X-Ray system, panel's target detection and deformation compensation (linear, non linear rotation, offset and scaling) and direct drilling or routing a regular job.

No need to move the panel or reload a different software.

Multiple inspection with multiple targets and multiple compensation per panel sections is possible..

AVAILABLE FEATURES:

- > LINEAR MOTORS
- > AUTOMATION SYSTEM
- > CONTACT BIT DETECTION
- > CCD CAMERA REGISTRATION SYSTEM
- > CONTACT / LINEAR DEPTH DRILLING
- > CONTACT / LINEAR DEPTH ROUTING
- > FLIP DRILLING
- > PANEL TICKNESS MEASUREMENT SYSTEM
- > AUTOMATIC BUSH CHANGE
- > BAR CODE
- > ONE STEP X-RAY DRILLING AND ROUTING
- > LARGE FORMAT
